

Strafford Energy Committee – Minutes from Tuesday Sept 22, 2015, 7:30 pm,  
Town Clerks.

In attendance: Ken Alton, Gus Speth, Barbara Smith and Janet Cavanagh.

1) We discussed the Select board's Information meeting re the renewable energy credits rec's for the Elizabeth Mine project which was very well attended and comprehensive in its representation from all the parties involved. We want to show our support for the project despite the rec's being sold and we decided to let the process take its course.

2) Ken will buy an app for his phone which will act as an infra- red camera to conduct energy consultations, and demonstrate the need for audits. *FLR*

3) Discussion of getting back to the Grass roots fund, which has provided grants for the World café, the pocket park and the mason hall weatherization. Dori, Barbara and Ken will get back to them.

4) Barbara updated us on the Global Mum fundraiser for the pocket park. It went very well and raised \$1000.00. This will be spent on more plants including plants to replace the invasive Buckthorn which has been removed, with Gooseberries and Currants. Also some of the \$\$ will be used on a heavy duty weed-wacker.

5) Community Solar, as a model to have solar and retire the rec's. Lee has more information.

6) Charging station grant proposal. This is an interesting possibility but we thought that it would not get much use in Strafford and were going to look into applying with Sharon.

Next SEC meeting will be Nov 17 2015 @ 7.30 pm.

Respectfully submitted, Janet Cavanagh, Recording secretary
